

Libraries are among the most challenging public access computing environments to secure and maintain. Amerikit Technology Solutions (ATS) offers products dedicated to enhancing IT control while increasing user satisfaction and productivity. Our solutions will eliminate workstation damage and downtime by making computer configurations indestructible.

Our public access computing (PAC) solution Patron Workstation will provide:

**Custom User Profiles:** Automatically launch predetermined applications upon startup, block access to specific menu items and hot-key combinations and restrict access to any application on the workstation. Examples of our custom profiles – All, Children, Spanish, Big Print, Administrator.

**Session Timer:** Create time-limited user session, decide whether users have the option to extend those session limits, or create multiple time segments that reference codes for users to input

**Support Multi-Lingual Users:** Specifying a different language for user profiles  
If you manage shared computers in a large organization or for users with different language needs, you might want to provide programs in multiple languages.

**Privacy Settings:** Privacy settings help you protect the privacy of all users of a shared computer

**Automatically Download and Install Updates:** automatically install Critical Windows updates and Third-party antivirus software programs.

**Security From Theft:** Heavy-duty computer cable lock kits give the highest strength available to physically secure and type of desktop computer.

**Data Protection:** any changes made to the computer—regardless of whether they are accidental or malicious—are never permanent.

- Amazon Trail 3rd Edition Rainforest Adventure
- Strategy Challenges Collection 2: In The Wild
- Thinkin' Things Collection 3 : Galactic Brain Benders
- Mighty Math Calculating Crew

## The **LearningBoard™**

The **LearningBoard™** is an excellent way for your elementary-aged student to master keyboarding and computer skills, and phonics. The LearningBoard maximizes Chester Creek's color-based mnemonic system to teach and reinforce reading skills. Consonants, vowels, punctuation marks, numbers and computer function keys each have their own vivid color to help students understand their different roles in reading and language. Plus, the layout and key selection are the same as adult models, which makes for easy touch-typing. Practice and success will help your child develop good sentence structure, build memory skills and gain confidence.

As a partner to one of the most giving non-profit organizations, Amerikit's management team proudly facilitated the largest library technology program in U.S. history. We managed the deployment of 60,000 custom-built computers and accessories to over 15,000 libraries across the country. Our years of experience and your requests for assistance have uniquely positioned us to offer complete comprehensive public access computer solutions customized specifically to your needs. The computer solutions we customize are specifically built with your issues and concerns in mind.

Amerikit offers a complete line of Servers, Desktops, Laptops and printer's, we are your *1 call - 1 team - 1 solution partner*. Contact Amerikit today for all of your computing needs.
